

NEW GENERATION K3 FOOT

Contemporary design

A futuristic design
inspired by organic lines.

Encapsulated carbon blade

The first prosthetic foot with
complete protection against
water and sand ingress.

Seamless transitions

Go from the beach, to the car,
to the pool or home without
worrying about cleaning the foot.

K3 foot

A dynamic split carbon
blade with eversion / inversion
and smooth rollover.

Ultra light: 585G

One of the lightest feet in the
category.

Barefoot sensation

The flexible cover with shock
absorption effect provides a new sensation
of flexibility and silence.

Anti-slip technology

Increased ground grip, even on
the most slippery surfaces.

**DISCOVER IT
NOW**

Sand, water, slippery ground... No matter the terrain. The SQY Foot helps you stay on course.

An encapsulated blade for transitioning smoothly from one surface to another:

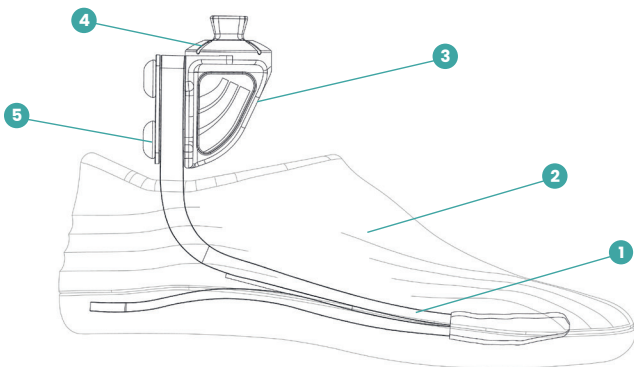

- Easy drying and cleaning after exposure to sand or water,
- Simple and quick towel wiping,
- Easy to put shoes back on.

A next-generation elastomer capsule, equipped with an anti-slip feature, allows:

- Optimal grip on damp or wet surfaces,
- Complete waterproofing against water, sand, and debris...
- User peace of mind on all types of surfaces.

All the benefits of a carbon fiber foot:

- **Dynamic response** for smooth and effortless rollover,
- **Inversion and eversion** providing stability on uneven terrain,
- **A K3 activity level** designed for active users.
